

INDEX TO VOLUME XCV

Alphabetical Table of Contents of Authors

- ACTON, A. B., An unsuccessful attempt to reduce recombination by selection, 119
- AMERICAN SOCIETY OF NATURALISTS, Reports of Secretary, Treasurer, and Editor, 261
- ANDRADE, J. D., See W. BEÇAK
- BEÇAK, M. L., See W. BEÇAK
- BEÇAK, W., J. D. ANDRADE, and M. L. BEÇAK, Short-term culture of leucocytes from monkey peripheral blood, 383
- BENDER, M. A., and S. WOLFF, X-ray induced chromosome aberrations and reproductive death in mammalian cells, 39
- BERNSTEIN, NOEMI, and E. GOLDSCHMIDT, Chromosome breakage in structural heterozygotes, 53
- BRNCIC, DANKO, and EDUARDO DEL SOLAR, Life cycle and the expression of heterosis in inversion heterozygotes in *Drosophila funebris* and *Drosophila pavani*, 211
- BRYAN, G. W., See E. D. GARBER
- BRYSON, VERNON, In memoriam, 5
- CAIN, A. J., and P. M. SHEPPARD, Visual and physiological selection in *Cepaea*, 61
- CAPON, B., See E. D. GARBER
- CARSON, HAMPTON L., Rare parthenogenesis in *Drosophila robusta*, 81
- COOK, L. M., The edge effect on population genetics, 295
- CREECH, R. G., and H. H. KRAMER, A second region in maize for genetic fine structure studies, 326
- CROUSE, HELEN V., X-ray induced sex-linked recessive lethals and visibles in *Sciara coprophilia*, 21
- DEL SOLAR, EDUARDO, See DANKO BRNCIC
- DUNN, L. C., Big and little populations: An amateur's excursion, 129
- ERICKSON, JOHN, and G. D. HANKS, Time of temperature sensitivity of meiotic drive in *Drosophila melanogaster*, 247
- FROTA-PESSOA, O., On the number of gene loci and the total mutation rate in man, 217
- GARBER, E. D., G. W. BRYAN, B. CAPON, L. B. LIDDLE, and M. W. MILLER, Evidence for parthenogenesis in *Aspergillus nidulans*, 309
- GOLDSCHMIDT, ELISABETH, See NOEMI BERNSTEIN
- HAILMAN, JACK P., Why do gull chicks peck at visually contrasting spots? A suggestion concerning social learning of food-discrimination, 245
- HAMILTON, TERRELL H., On the functions and causes of sexual dimorphism in breeding plumage characters of North American species of warblers and orioles, 121
- HANKS, G. D., See JOHN ERICKSON
- HO, F. K., See I. M. LERNER
- HOCKMAN, B., On fourth chromosome lethals from a natural population of *Drosophila melanogaster*, 375
- HUTCHINSON, G. E., The paradox of the plankton, 137
- JAIN, H. K., and S. K. JAIN, Differential non-genetic variability in the expression of major genes and polygenes, 385
- JAIN, S. K., See H. K. JAIN
- KING, J. C., Divergent responses to selection by two populations of *Drosophila melanogaster*, 7
- Inbreeding, heterosis and information theory, 345
- KLOPFER, PETER H., and R. H. MACARTHUR, On the causes of tropical species diversity: Niche overlap, 223
- See BRUCE L. WELCH
- KOJIMA, K., A note on crossover coincidence, 324
- KRAMER, H. H., See R. G. CREECH
- LASKOWSKI, W., See W. STEIN
- LERNER, I. MICHAEL, and F. K. HO, Genotype and competitive ability of *Tribolium* species, 329
- LEWIS, HARLAN, Experimental sympatric populations of *Clarkia*, 155
- LIDDLE, L. B., See E. D. GARBER
- LONG, H. C., See D. J. McDONALD
- MAC ARTHUR, R. H., See PETER H. KLOPFER
- Population effects of natural selection, 195
- MC CLINTOCK, BARBARA, Some parallels between gene control systems in maize and in bacteria, 265
- MC DONALD, D. J., and H. C. LONG, The effect of neutron irradiation on the fertility of *Tribolium confusum*, 124

- MAC INTYRE, PAMELA A., Crossing over within the macromelanophore gene in the platyfish, *Xiphophorus maculatus*, 323
- MANGE, ELAINE, J., Meiotic drive in natural populations of *Drosophila melanogaster*. VI. A preliminary report on the presence of segregation-distortion in a Baja California population, 87
- MILLER, M. W., See E. D. GARBER
- MUKHERJEE, A. S., Effect of selection on crossing over in the males of *Drosophila ananassae*, 57
- NOVITSKI, E., Chromosome breakage in inversion heterozygotes, 250
- OWEN, D. F., Industrial melanism in North American moths, 227
- PASSANO, K. N., See HALLY J. SAX
- PIMENTEL, DAVID, Animal population regulation by the genetic feedback mechanism, 65
- PIMENTEL, DAVID, See FREDERICK A. STREAMS
- RASMUSSEN, D. I., Cellular antigenic differences between individuals of the species *Peromyscus maniculatus*, 59
- SAND, SEAWARD A., Position effects and genetic code in relation to epigenetic systems, 235
- SAX, HALLY J., and K. N. PASSANO, Spontaneous chromosome aberrations in human tissue culture cells, 97
- SCHMID, WERNER, The differential susceptibility of sperm and spermatids to ionizing radiation, 103
- SETO, FRANK, A developmental study of recessive lethals from wild populations of *Drosophila melanogaster*, 365
- SHEPPARD, P. M., See A. J. CAIN
- SLOBODKIN, L. B., Preliminary ideas for a predictive theory of ecology, 147
- SMATHERS, KATRINA M., The contribution of heterozygosity at certain gene loci to fitness of laboratory populations of *Drosophila melanogaster*, 27
- STEIN, W., and W. LASKOWSKI, Comment on Dr. F. Hutchinson's paper and reply to our letter, 127
- STEPHENS, S. G., A remote coincidence, 279
- STREAMS, FREDERICK A., and DAVID PIMENTEL, Effects of immigration on the evolution of populations, 201
- VALEN, LEIGH VAN, Natural selection on a spontaneous inversion, 113
- WELCH, BRUCE L., and P. H. KLOPFER, Endocrine variability as a factor in the regulation of population density, 256
- WHITE, M. J. D., The role of chromosomal translocations in urodele evolution and speciation in the light of work on grasshoppers, 315
- WILSON, E. O., The nature of the taxon cycle in the Melanesian ant fauna, 169
- WOLFF, SHELDON, See M. A. BENDER
- YERGANIAN, GEORGE, Patterns of sex-determining mechanisms, 252

Subject Index

- Activator,
 gene control system, 267
- adrenal weight in mice, 256
- agglutinins, 59
- alleles, 367, 377
- American Society of Naturalists,
 presidential address, 129
 report of Secretary, Treasurer, and Editor, 261
 symposium, 137, 147, 155, 169, 195
- Aspergillus nidulans*, 309
- autochthonous taxa, 184
- bacteria, 265
- balanced polymorphism, 113
- bank vole, 296
- beetles, 329
- biological information, 357
- birth rate, 196
- Biston cognataria*, 228
- Biston betularia*, 227
- blood, 383
- boundary conditions, 150
- Cajanus, 386
- Cepaea hortensis*, 63
- Cepaea nemoralis*, 61, 298
- chaetae, 201
- chiasmata, 279
- Chinese hamster, 254
- chromatid deletions, 98
- chromosomal translocation,
 in urodeles, 315
- chromosome,
 fourth, in *Drosophila*, 375
 radiation sensitivity, 39
 reduplicated ends, 319
 restitution, 109
 Rhesus monkey, 383

- chromosome aberrations,
 - relation to age of tissue culture, 97
 - spontaneous in human cells, 97
 - two-hit, 46
 - x-ray induced, 39
- chromosome arrangements,
 - differential mortality, 212
- chromosome breakage,
 - in inversion heterozygotes, 250
 - in structural heterozygotes, 53
- cistron, 358
- Clarkia biloba*, 155
- Clarkia lingulata*, 155
- Clethrionomys glareolus*, 296
- Clethrionomys nageri*, 296
- coadaptation, 302
- coincidence, 279, 324
- commensalism, 141
- competition,
 - interspecific, 329
- competitive exclusion, 137
- Cricetulus griseus*, 254
- crossing over, 57, 283, 324
 - in macromelanophore gene, 323
- cycle,
 - taxon, 169
- death rate, 196
- Dissociation,
 - gene control system, 267
- DNA, 127, 235, 357
- drift, 299
- Drosophila ananassae*, 57
- Drosophila funebris*, 211
- Drosophila melanogaster*, 201, 345, 375
 - chromosome frequencies, 15
 - crossing over in X-chromosome, 283
 - fitness, 27
 - hatching time, 7
 - heterozygosity, 27
 - inbreeding, 345
 - meiotic drive, 87, 247
 - selection, 7, 119
- Drosophila pavani*, 211
- Drosophila pseudoobscura*, 113
- Drosophila robusta*, 81
- ecological release, 183
- ecology, 147
- edge effect,
 - in population genetics, 295
- embryonic development,
 - in *Drosophila*, 353
- endocrine variability,
 - population density of mice, 256
- energy, 148
- epigenetic systems, 235
- Epimecis hortaria*, 228
- erythrocyte antigens, 59
- evolution,
 - isolation, 201
 - immigration, 201
 - role of translocations, 315
- faunal drift, 172
- fertility, 207
 - effect of neutrons, 124
 - of impaternate *Drosophila*, 84
- fibroblasts,
 - radiation sensitivity, 44
- food chain efficiency, 151
- gene
 - control, 265
 - number in man, 217
 - operator, 265
 - regulator, 265
 - sex-linked, 217
 - structural, 265
- genetic,
 - code, 235
 - feed-back, 65
 - fine structure, 326
 - geographic distribution, 196
 - homeostatis, 207
- Geometridae, 228
- germ cells, 103
- grasshopper, 315
- hatching,
 - in *Drosophila*, 345
- heterosis, 27, 211, 345
- homeostatis, 352
- Hordeum, 386
- Hydra, 151
- immigration, 201
- impaternate females, 82
- inbreeding, 345
- information theory, 345
- insular faunas, 172
- interference, 279
- inversion, 90
- inversion heterozygotes, 211, 250
- ionizing radiation
 - effect on germ cells, 103
- k values, 83
- Laughing gulls,
 - social learning, 245
- lethality
 - ontogenetic distribution, 370
- lethals, 365, 375
- leucocytes, 383
- life cycle, 211
- linkage, 289
- Macaca mulatta*, 383
- maize, 265, 326
- mammalian cells, 39, 383
- man,
 - mutation rate, 217
 - sex ratio, 217
- mathematical model,
 - of population cycles, 70
- "mean break dose," 43

- meiotic drive, 87, 247
- Melanesia, 169
- melanism,
 - industrial, 227
- melanophore,
 - in platyfish, 323
- mice,
 - natural populations, 129
- migration, 299
- Montgomery effect, 339
- moths, 227
- mutation rate,
 - in man, 217
- mutations,
 - in *Sciara*, 21
- myxomatosis, 67
- natural selection, 113, 195
- neutrons,
 - effect on germ cells, 105
- niche overlap, 223
- Noctuidae, 228
- orioles, 121
- "pair-bonding behavior," 121
- parthenogenesis, 81, 309
- Peromyscus maniculatus*, 59
- phenodeviant, 362
- phytoplankton, 137
- platyfish, 323
- plumage characters, 121
- pollen,
 - maize, 326
- polygenes, 201, 385
- polymorphism, 27
- population,
 - biology, 129
 - crashes, 259
 - genetics, 295
 - genetic feed-back regulation, 65
 - lethal frequency, 375
 - mixed, 167
 - sympatric, 155
 - wild, of *Drosophila*, 365
- position effects, 235
- predation, 141
- pseudo-alleles,
 - Drosophila*, 290
- radiation
 - genetic effect, 220
 - mechanism of killing, 49
 - neutron effects on fertility, 124
- radiation-induced lethals, 379
- recessives,
 - hypomorphic, 385
- recombination, 119
- relative biological efficiency, 108
- Rhesus monkey, 383
- Saccharomyces*,
 - x-ray inactivation, 127
- salivary gland chromosomes, 114, 212
- Schultz-Redfield effect, 289
- Sciara coprophila*, 21
- segregation distortion, 87
- selection,
 - effect on crossing over, 57
 - intensity, 207
 - to reduce recombination, 119
 - visual and physiological, 61
- sex-determination,
 - mammals, 252
- sex-ratio, 195
- sexual dimorphism,
 - in breeding plumage, 121
- snail, 298
- speciation,
 - centrifugal, 298
- species,
 - bird, 223
 - distribution, 139
 - diversity, 197, 223
 - expanding, 174
 - interaction, 198
- sperm,
 - sensitivity to ionizing radiation, 103
- spermatogenesis,
 - Drosophila*, 249
- spontaneous inversion, 113
- structural heterozygotes, 53
- Suppressor mutator, 267
- symbiosis, 141
- synapsis, 316
- taxon cycle, 169
- temperature,
 - effect on crossing over, 291
 - relation to hatching time, 351
 - sensitivity of meiotic drive, 247
- tissue culture,
 - human cells, 97
- Tradescantia*, 41
- Tribolium castaneum*, 124, 329
- Tribolium confusum*, 124
- Trimerotropis gracilis*, 317
- Triturus*, 315
- warblers, 121
- Xiphophorus maculatus*, 323
- x-ray,
 - induced chromosome aberrations, 39
 - induced lethals, 21
 - sperm and spermatids, 107
